DESCRIPCIÓN DEL PROYECTO / PROJECT DESCRIPTION.	<p>“Vot.E.” Vote Europe!</p> <p>The project “Vot.E. – Vote for Europe” is a youth exchange for organizations active in the youth field and youth people in the context of YiA program.</p> <p>“Every election is determined by the people who show up.” – Larry J. Sabato, Pendulum Swing</p> <p>In a period when the EU is facing economic and financial crisis, it has, at the same time, to protect its institutions and continue its activities and proceedings. On May 2014, the European Parliament Elections will take place, and they are important because, after the Lisbon Treaty, these elections will be the first to test the effectiveness of this institutional reform.</p> <p>However, according to the European Commission around one thirds of the young Europeans might abstain from voting.</p> <p>There is no question that many young people nowadays are not satisfied with the problems their countries are facing, as the impact of the crisis is turning back at them and their future. Not voting might be a way to object or simply a result of ignorance.</p> <p>The focal point of the project will be to acquaint the young people with the EU and the ways it works; to take a deeper look at what it has to offer to the citizens and show the necessity of voting in the upcoming elections in order to enhance the spirit of being an active citizen in all levels.</p> <p>We want to be able to shape our future, to have a word to it. We want a better future for everyone. Taking action is the only way.</p> <p>The project will take place from 01/04/2014 until 08/04/2014 in Athens, Greece and it will last 8 days.</p> <p>For more information, please send to: <a href="mailto:youth@civisplus.gr">youth@civisplus.gr</a></p>

It is clear that old economic model that run until the first years of the 21th century is no longer fit for the new global system. We need a new model that integrates social inclusion and sustainability with growth and employment. This new model can be social enterprise. It</p>

	<p>represents a new socio-economic paradigm able to combine productivity with social needs, interests of capital with people ones. The project wants to make participants know of this necessity, underlining relationships between business activities and social ones and showing it is possible doing business activities and social ones at the same time. In this respect our project specific objectives are:</p> <p>1.) To promote the non-formal education based on theatre/drama techniques as a tool for improving youth's civic participation at the level of 28 participants active in grassroots or community-based youth organizations from 7 different EU countries</p> <p>2) To foster the "European Citizen feeling" (and one of the most important right, the right to vote) and encourage participation in the 2014 European elections and enabling in this way 28 young people who will going to vote for the first time in May 2014 not only to behave as active, informed citizens but also to become information multipliers at the level of their organizations and convince other young</p>

	<p>persons of the importance of participation to the poll, especially and on the importance of being an active European Citizen in general</p> <p>3) To allow 28 participants active in grassroots or community-based youth organizations from 7 different EU countries to participate together in a joint programme of creative activities that will empower them (beside the two objectives mentioned above) to discover and become aware of different social and cultural realities, to learn from each other and reinforce their sense of belonging to a wider and relevant trans-national community.</p> <p>We intend to gather in Sibiu (<a href="http://en.wikipedia.org/wiki/Sibiu">http://en.wikipedia.org/wiki/Sibiu</a>) in March 2014, for 10 days, 28 participants from 7 different European state members (that acceded EU at different historical moments) – young persons that are going to vote first time (or at least first time for the European Parliament) in 2014. They will participate to a set of theoretical and practical activities developed in an interactive, intercultural and non formal educational environment. The theoretic part consists of multimedia interactive presentations about key facts of European Union’s History, Values, Institutions and Making Decision process. Based on the information gained during these presentations, participants will create a screenplay about the decisional process at EU’s level – they assume a role of an European Parliamentary and act in accordance with this. As the process of “translate into normal life” is very difficult even for European Institutions, we would prefer participants with a previous experience in theatre, that’s why we were thinking at you as partenrs</p> <p>We attached a draft agenda that will be finished after we will decide the final structure of the partnership.</p> <p>We will be glad to have you as partners in this ambitious project and host you in our wonderful town.
