Training Course PROJECT

E-YOUTH WORKER

Fontenay-sous-Bois du 20 Au 28 MAY 2019

DESCRIPTION

Virtual mobility is an extremely useful tool for facilitating or creating collaborative and learning experiences between people living in different countries without moving. Although more and more formal education and vocational training structures are using it, it is still little used in the field of non-formal education.

However, young people are increasingly confronted with the need to develop essential skills for a social and professional life in which internationalization becomes more and more important. The effective use of the NICT is part of it as well as a relevant interaction and a high mobility with people abroad whether physically or remotely.

Virtual mobility can also create a sense of European citizenship among young people who learn to work together and form teams across borders. In addition, it provides a European experience for all those who can not benefit from face-to-face programs for social, geographical or other reasons. At the institutional level, virtual mobility initiatives create strong competition between institutions, which contributes to the competitiveness and quality of the training and service offer. This enriches the usual environment of youth organizations.

However, there is often a lack of coordinated promotion of pioneering virtual mobility activities, and targeted communities are unaware of the key products, results and experiences of the pilot projects. As a result, many of the virtual mobility activities, organized by a few early adopters, remain isolated cases and are often seen as an interesting addition to, but not an integral part of, a classical course.

This attitude towards virtual mobility is an obstacle to large scale collaboration at European level between youth organizations and young people themselves.

We wish to explore the pedagogical use of ICTs as learning tools in the context of non-formal education. Virtual mobility is possible through the use of information and communication technology-based environments, such as videoconferencing, live streaming, shared workspaces, and computer-assisted conferencing. How to conceptualize the virtual mobility of youth projects? And what place will young leaders have? Different types of virtual mobility?

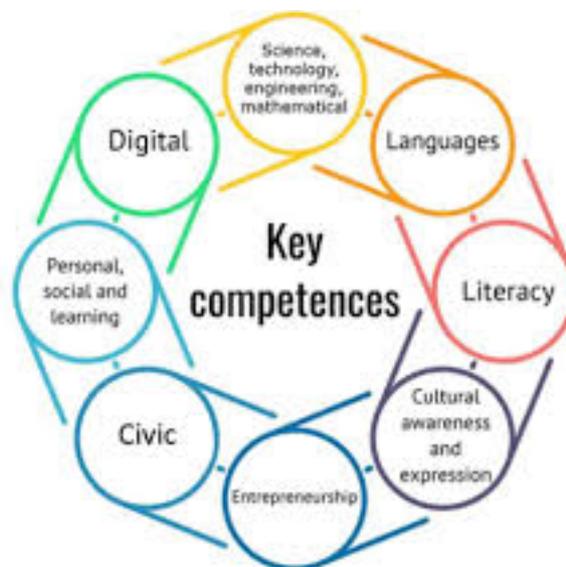

The idea of "virtual mobility" in youth projects, the use of ICTs and other creative tools will be developed in a practical way.

Social networks are now unavoidable; they are used by individuals, as by companies; personally and professionally. They are particularly used during mobility experiences and anchored in everyday life. They induced new behaviors and created new trades. They are linked to an ever-changing technology that requires adaptations for both their use and their offer.

We initiated this project with the objective of:

- understand and be ready to include virtual mobility in youth projects
- recognize and analyze the specific learning outcomes of virtual mobility
- discover and encourage virtual mobility opportunities for youth projects
- improve digital skills and learn to learn the skills of youth workers

We also want to develop and create new online collaborative exchange tools to enable participants to make their mobility project for young people more efficient.

Travel Costs

Country	Means of transport	Number of people per Association	Forfait par personne
Fédération Nationale des Associations Franco-Africaines (FRANCE)	Bus, train, flight	5	0
YOUTH VENTURE BERLIN (Allemagne)	Bus, train, flight	3	275 €
SDRUZHENIE PROMYANATA E V TEB (Bulgaria)	Bus, train, flight	3	360 €
AJ INTERCAMBIA (SPAIN)	Bus, train, flight	3	275 €
SCAMBIEUROPEI (Italie)	Bus, train, flight	4	275 €
P.R.S.D. - ASSOCIACAO, PROVIDORES DE RESPOSTAS SOCIAIS PARA O DESENVOLVIMENTO (PORTUGAL)	Bus, train, flight	4	275 €

REFUNDING

We will refund you based on actual costs incurred and on presentation:

- invoice of the plane ticket
- Boarding Pass with the clear mention of the passenger
- All other transportation-related bills

All refunding procedures will be done after the training project and directly to your sending association, which is the official partner of the project. No possibility of individual refund (thank you for your understanding).

INSTRUCTIONS TO ARRIVE AT BRY-SUR-MARNE

the Hotel is at

City residence of Bry-sur-Marne

Address: 80 Avenue Georges Clemenceau, 94360 Bry-sur-Marne

Take RER A direction Marne la Vallée Get off at Bry Sur Marne

The Residence is just a minute walk away

Phone: +33 (0) 1 55 98 50 00

My phone number if needed

Mr KOUYATE: +33624725130

Mail: fnafa.asso@yahoo.fr

IMPORTANT:

Please check the time of the last train before purchasing your tickets.

Working languages: French and English.

Simultaneous translation will be available during the training. It is mandatory that participants speak one of the two working languages. Thank you for your understanding and take it into account when selecting applications.
